OUR MISSION

Converge Net has an answer for your every need. With the help of our dedicated sales managers that take ownership of each of their accounts and make sure that you, the customer, are always satisfied with the end result.

We have a winning team that works together to achieve a common goal, the goal of earning your trust.

OUR VISION

We consider our customers as partners and ensure the success of their business activities.

Since 2001, Converge Net has been helping customers in assuring that their networks are 100% reliable and secure. We offer our services in assisting with immediate needs or by becoming trusted advisors and working with our customers to improve their network environment.

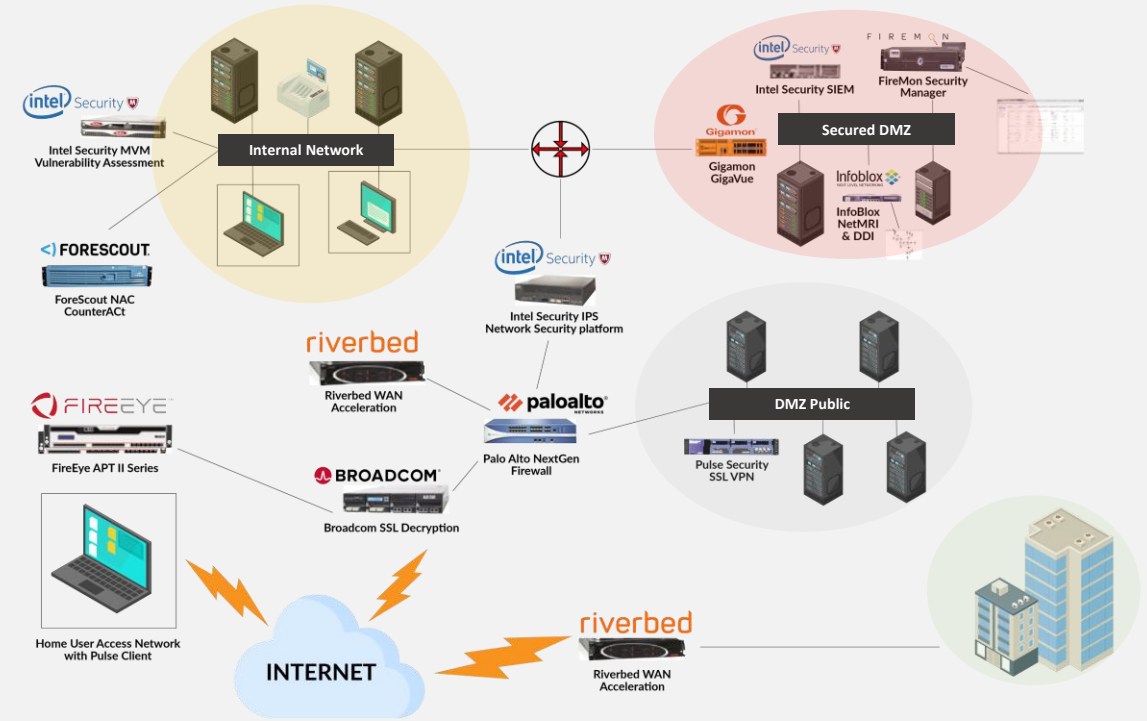

OUR PARTNERS

WHAT KEEPS YOU AWAKE AT NIGHT?

- Are my workforce laptops protected?
- Who has access to my important files and data?
- Are we compliant with privacy laws and other legislation?
- Are my servers and workstations security patches up to date?
- Is my network vulnerable?
- Is my data safe?
- Can we afford a data breach?

VISION OF THE **CNI** NETWORK

A GLOBAL VIEW OF YOUR OVERALL SECURITY

Security is no longer a simple solution...

where everything behind a firewall is protected. With the evolution of IP everywhere companies are opening access to their internal network to allow users and partner to come in via Virtual Private Networks (VPNs).

Make your servers available to the public...

also opens the door for hackers and cyber criminals to take down networks and steal confidential information. Your company's credibility and reputation are then compromised.

CNI has established strategic partnerships...

with manufactures that not only have credible solutions in the market but are, at the core, security and network focused companies. Their solutions mature and react to today's threats, all the while their R&D are proactively working on staying one step ahead of the next threat.

CDMS
